

## Absorbine® Announces Hooflex+® 30-Day Supply In Resealable Bags

Hooflex+, Absorbine's therapeutic pelleted 30-day supply hoof supplement, is offered in an easy-to-use resealable bag. The zipper helps maintain the freshness of the product while keeping unwanted pests out. The apple flavor has been a proven success. A side benefit to retailers is that this flexible bag will utilize less shelf space.

Hooflex+ is a pelleted hoof supplement clinically proven to promote strong, flexible hooves plus healthy hair, skin, and coat. In addition to supplying nutrients needed for strong, flexible hooves, hoof growth is accelerated through key amino acids. Fortified with nutrient-rich stabilized rice bran for optimal bio-availability, Hooflex+ contains biotin, methionine, vitamin E and lysine. Hooflex+ is recommended as part of a daily health regimen for at least nine to twelve months, since that is the average time required for regrowth of the wall, sole, and frog of the hoof. Hooflex+ can safely be fed to foals and pregnant mares.

Founded in 1892 by Wilbur Fenelon Young and his wife, Mary Ida, W. F. Young, Inc. has provided over a century of quality health care products for the equine industry. From its headquarters in East Longmeadow, Massachusetts, the company is committed to extending this heritage into the new century.
